

Bristol Regional Counseling Center

Adult Services

Frontier Health Strives to meet the needs of each individual; we understand that circumstances and life changes have different challenges.

- **Therapy Services:** Therapy services involve therapists assisting individuals with a variety of behavioral problems to include depression, anxiety, mood and thought disorders and substance abuse issues. This can be through individual, group or family therapy.
- **Psychiatric Services:** Psychiatrists and Nurse Practitioners are available to provide medication evaluation and monitoring for those who need medication as part of their treatment plan.
- **Care Management:** Care managers help link the individual with resources to support their mental health and medical needs and goals. This is often completed in the community or in the home.
- **Community - Based Services:** Based on need, some individuals may access other community-based services such as vocational services, housing referrals, and psychosocial rehabilitation.
- **Specialized Substance Abuse Services:** Trained substance abuse professionals assist individuals in addressing abuse and addiction issues.

Frontier Health accepts most private insurances, EAPs, and TennCare. Frontier Health also offers a variety of grants for those who might be eligible.
