Empowering & Restoring Hope

We offer a comprehensive and individualized approach to address addiction and co-occurring disorders. We recognize that there is no “one-size fits all” solution. Through a combination of various evidence-based practices and support services, we strive to provide patients with the necessary support and care to help them on their journey to recovery.

At our clinic, you will receive professional care from our licensed Mental Health Providers while participating in our unique rehabilitation treatment program. Your comprehensive treatment will take place in an office setting that will be personalized to your needs.

Board Certified in Addiction Medicine, Dr. Kassis and other addiction specialists understand that addiction is a disease that may require treatment for extended periods of time to prevent relapse. We will help to keep you encouraged and motivated to stay on track with recovery.

Our goal is to help patients get the treatment they need close to home.
