

Frontier Health Housing Continuum

Frontier Health strives to promote housing stability based on the needs and preferences of the individual served. The ultimate goal is for each individual we serve to reach his or her highest level of residential independence.

The continuum goals are:

- To maximize daily living skills
- To maximize social skills
- To become as integrated into the community as possible
- To reduce psychiatric and medical hospitalizations
- To increase family interactions as appropriate

Throughout the continuum, housing plans are tailored to specific individual needs. Working together, staff and individuals determine goals and steps to reach those goals.
